

Documenting School Out Days

Document school out days for all school-age children (6 years +) and children attending Kindergarten, Preschool, and Head Start (away from the provider's home). If you serve a child on a weekday while the child would normally be in school, there is usually a reason for it. Perhaps school is out for winter, spring, or summer break. Or maybe it's an in service day. Or perhaps the child is sick, staying home from school but still attending your child care. If a child is home sick, put a check in the column labeled "Sick" when recording your meals. If a child's school was out that day, put a check in the "Sch Out" column when recording your meals.
