5 NEW CODES ADDED TO KIDKARE TO ACCOMMODATE USDA MEAL PATTERN WAIVERS

Effective August 1, 2020, if you are unable to find or purchase one of the required food or beverage items at the grocery store for breakfast, lunch or dinner, you must select one of the new codes below to complete your menu and receive reimbursement for the meal.

- 128 Meat/Alternate not available
- 235 Bread/Alternate not available
- 002 Vegetable not available
- 003 Fruit not available
- 1 Milk not available

FOR PROVIDERS USING THE SCAN (bubble) CLAIM FORMS

Effective August 1, 2020 you must write “Not Available” on the food component line at breakfast, lunch or dinner if you are unable to find or purchase one of the required foods on your menu to receive reimbursement for the meal.

- New codes (see above) or “not available” may only be used at breakfast, lunch or dinner meals, NOT Snacks.
- Required food components missing or not written for meals will be disallowed.

At this time, we find that all grocery stores are well stocked and Providers should not have to use the new codes or “not available” on a regular basis. If we find that a Provider is always using these codes to complete a meal we will call to verify the reason. This update will ensure that Providers are trying their best to meet USDA meal pattern regulations and, due to no fault of their own, could not find or supply one required missing food component at breakfast, lunch or dinner.
